

Solutions for Awnings

Maximum pleasure, minimum effort!

SOMFY, the french manufacturer, designs and develops motors and controls for openings and closures of homes. All Somfy solutions have the same aim: to offer their users comfort and security while making life easier at home. **All SOMFY motors are guaranteed for 5 years.**

Your terrace, garden, veranda or balcony can become extra living space. To lunch in the shade, tan in controlled conditions or dine in the dry, all you need is an **awning!**

Maximise your awning's potential.

Install a SOMFY motor and control system and you will enjoy:

➤ **Greater convenience:**

Forget the hard labour involved in manually cranking your awning in or out. Raise or extend your awning with the touch of a button convenience.

➤ **Greater durability:**

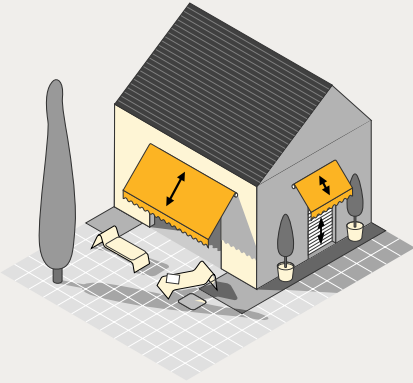

Replacing manual handling with smooth motorised control ensures your awning fabric is always tensioned or rolled correctly and the awning mechanics are never forced. Ultimately, Somfy motorisation will extend the life span of your awning.

➤ **Greater awning protection:**

Install automatic sun and wind sensor controls to have your awning open or close automatically, according to weather patterns, even when you are not at home.

SOMFY control options for awnings

Remote control

Operate your awning from wherever you are using your remote control and adjust it to your favourite position at the touch of a button. You can even control your awning individually or in group. Your Telis Patio remote control is water resistant and shock proof, ideal for outside use.

Wind sensor control

Protect your awning from the wind.

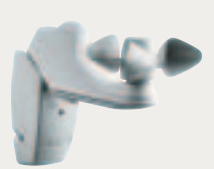

Your awning runs no risk of getting torn! It retracts automatically if the wind picks up, even if you are away from home. Highly recommended for peace of mind!

Wind sensor

Sun and wind sensor control

Your awning reacts automatically to the weather. As soon as the sun comes out, it extends automatically, and your patio and rooms are shaded and remain cool. If a storm threatens or the wind picks up, your awning retracts automatically.
